PROFESSIONAL PROFILE

Final-year Bachelor of Science in Informatics student at the University of South Africa (UNISA), with 240 NQF credits accumulated and practical experience designing, developing and deploying web applications. Skilled in Python, Flask, SQL, PostgreSQL, MySQL, JavaScript, React, C++ and Qt, with additional exposure to requirements analysis, database design, stakeholder analysis, Power BI and deployment platforms. Delivered a production website for a real South African resort and developed a personal portfolio to present technical work professionally. Seeking graduate, internship or junior opportunities in software development, business analysis, data analysis, data engineering or related technology roles.

EDUCATION

Bachelor of Science in Informatics - University of South Africa (UNISA)

Final year | Expected completion: 2026 | 240 NQF credits accumulated

Final-year studies: Computer Networks I, Advanced Programming, Databases II, Advanced Systems Development, Database Design and Implementation, Software Project Management, Human-Computer Interaction II, Corporate Entrepreneurship, and Strategic Implementation and Control IIIB.

Academic achievement: 8 distinctions, including Visual Programming II (93%), Introduction to Entrepreneurship and Small Business Management (91%), Programming: Contemporary Concepts (83%), Structured Systems Analysis and Design (79%), Visual Programming I (78%), Strategic Planning IIIA (78%), Human-Computer Interaction I (77%) and General Management (75%).

TECHNICAL SKILLS

Programming	Python, JavaScript, C++, SQL
Web Development	Flask, React, HTML5, CSS3, Bootstrap, Tailwind CSS
Databases & Data	PostgreSQL, MySQL, SQLAlchemy, pandas, Power BI
Tools & Platforms	Git, GitHub, Vercel, Render, Qt
Business & Systems Analysis	Requirements gathering, BRD, SRS, UML, stakeholder analysis, database design

COMPLETED PROJECTS & CLIENT WORK

Oluhle Resort Website - Real Client Project

Python | Flask | HTML5 | CSS3 | Bootstrap | Flask-Mail | Deployment | SEO

<https://oluhleresorts.co.za>

- Designed, developed and deployed a production website for a South African resort with 20 chalets and multiple services, creating a professional online presence accessible across desktop and mobile devices.
- Developed an online booking form that captures customer details, booking dates, guest information, selected resort services and special requests, with validation to support accurate booking submissions.
- Implemented automated email functionality so submitted booking information is sent to resort reception while the customer receives a corresponding confirmation, supporting the resort's manual booking-management process.
- Managed production deployment and domain configuration for the live website, created a sitemap and configured Google Search Console to support search-engine discovery and indexing.
- Worked directly with a real client and translated business requirements into a functioning web solution while keeping production source code and client information private.

Personal Portfolio Website - Completed Portfolio Project

React | Vite | JavaScript | Tailwind CSS | Framer Motion | Git | GitHub | Vercel

<https://bonolo-bml.vercel.app>

- Designed and developed a responsive personal portfolio using React and Vite to present education, technical skills, projects and contact information in a structured recruiter-friendly format.
- Built the interface using reusable React components and Tailwind CSS, with responsive layouts that adapt across desktop and mobile screen sizes.
- Added interactive user-interface elements and animations to improve navigation and presentation while maintaining a clear professional design.
- Used Git and GitHub for source control and project management, and deployed the production build through Vercel so recruiters and employers can access the portfolio online.

CORE COMPETENCIES

Software development | Full-stack web development | Database design | Systems analysis and design | Requirements gathering | Problem solving | Testing and debugging | Analytical thinking | Client communication | Team collaboration | Attention to detail

ADDITIONAL INFORMATION

Career interests: Graduate Software Developer, Junior Business Analyst, Data Analyst, Data Engineer and related technology roles.
